Delegat Online - The Papal Delegates in Hungary (11th-13th century)

The DeLegatOnline (FLEP-HUN) is a prosopographical database of the papal delegates' activities in the 11th-13th century Hungary which contains the data concerning their biography, studies, ecclesiastical career and papal delegations which are handled as the chains of events. These can be shown and downloaded in form of a data sheet and a complete study as well.

Although the database focuses on medieval Hungary, it includes the relevant representatives' whole biography, other delegations as well. During the development of the database we tried to emphasize the usability for specialists and a large public as well. Thus the database is - we hope so - not only a collection of „bare facts“ but a multidisciplinary and -functional presentation of the delegating supreme pontiff and the delegated representatives of the Catholic Church.
